

The Decentralized **Conversation Layer** of Internet

The Problem ○ ○ ○ ○

Fragmented Ecosystem

Conversations about a topic on one site are not accessible on others.

Fragmented Ecosystem

Each platform has a different place for interacting with users.

Control

Centralized platforms have the power to decide what is removed.

Control

A conversation motivated by likes and shares or to serve ads.

Solution

1

Decentralized Conversations.

Start an instant conversation on any website or topic, decentralized and unstoppable.

2

Extensible Architecture.

Your conversations live independent of the interface and can be extended to build custom interfaces via an API.

3

Governed by the Community.

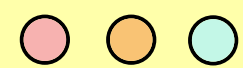

Convo utilizes conviction voting as a continuous decision making process by the community.

Potential Use-Cases/Integrations

NFTs

Ability to embed a Conversation along with an NFT, this means that you can have the story and the conversations around an artwork and its artist be embedded in the NFT itself and be available across any interface.

Transparency

Ability for a team to discuss about an specific transaction in a treasury of a company directly from their interface, and have the those show up on their website for transparency or vice-versa.

Awareness

Ability to discuss about a malicious contract or account on Etherscan and be able to pull those conversations in real-time and show them in wallets to aware users before sending anything to such an address.

And many more....

Progress to Date ✓

theconvo.space

Spin up a Convo on any website

Chrome Extension

One-click browser button to open a Convo.

theconvo.space

Embeddable Convo's to interact with your community anywhere.

theconvo.space

Decentralized Storage powered by Textile, IPFS and Filecoin

theconvo.space

An Extensible API to enable anyone to build on top of Convo.

theconvo.space

Single Dashboard to view all your convos throughout internet.

Upcoming →

theconvo.space

Multiple Integrations with platforms like Gnosis, Snapshot, MetaMask and more

theconvo.space

Conviction Voting powered and governance powered by the community.

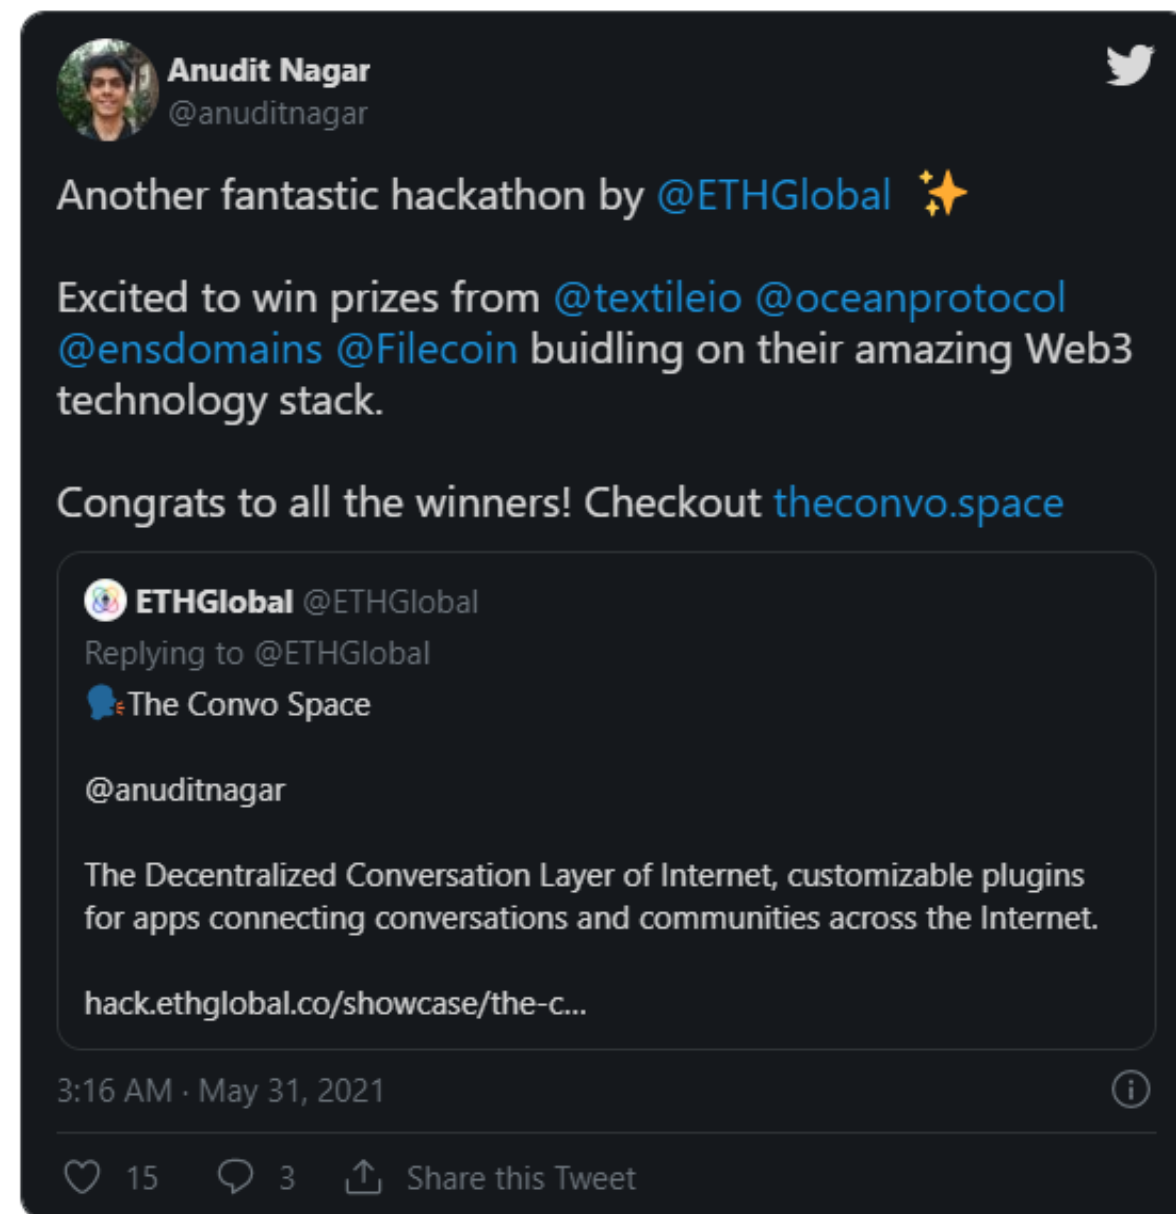

theconvo.space

Improved and Scalable Query engine to compose conversations from multiple sites

theconvo.space

Instant Convo's, Discover by Topics, Private Threads, Many more...
