# The Convo Space

Convo offers all the Tooling and Infrastructure to build Social Platforms that are composable across the web, powered by Web3.

Conversations are
bigger than channels!

Platforms don't talk, people do.

# Liquidity for Social platforms are the CONVERSATIONS.

Siloed channels that don't let conversations flow across the web.

You *create continuity*, by *enabling composability* of conversations across the web.

The Decentralized
Conversation Layer
of Internet

Continuous conversations.

Composable experiences.

Simple implementation.
